

StoraEnso

Stora Enso

Global leader in renewable materials

The renewable materials company

We are the renewable materials company

- A global leader in renewable materials, we deliver solutions for high-performance packaging, wooden construction, and biomaterials.
- With a stable, sustainable supply chain, we are a reliable and trusted partner for quality packaging and material development.
- We contribute to solving climate change by accelerating the transition to a circular bioeconomy for the benefit of people and the planet.

StoraEnso

We provide packaging materials and expertise for every customer need

StoraEnso

Consumer boards

Liquid packaging board

Food service board

Coated unbleached kraft

Solid bleached sulphate

Folding boxboard

Containerboards

Kraftliner

Recycled containerboard

Semi-chemical fluting

Kraft Paper

Paper products:
Book, newsprint, SC

Our world-class production capabilities ensure you stay ahead of competition

Five mills dedicated to consumerboard production

- Recent addition – high-volume new line in Oulu, Finland
 - 750,000 tons of folding boxboard (FBB) and coated unbleached kraft (CUK)
 - Uses Stora Enso's patented FiberLight Tec™ for lighter, stronger boards
 - 90 % reduction in fossil CO2 emissions – nearly carbon neutral production

Fors, Sweden
FBB

Skoghall, Sweden
CUK

Inkeroinen, Finland
FBB

Imatra, Finland
FSB, SBS

Oulu, Finland
FBB, CUK

We are setting new standards for packaging

Stronger performance, less material

- Lightweighting (-40-50%)
- High stiffness & box strength
- Barrier & product safety

Lower cost & environmental impact

- Reduced carbon footprint (-30%*)
- Lower EPR fees

Larger market opportunity

- Enables plastic substitution
- Expands addressable market

*based on Stora Enso internal assessment of comparable board grades

Our next-generation FBB and enhanced CKB provide future-ready packaging today

StoraEnso

Performa Nova™

Folding boxboard (FBB), fully coated CTMP board with uncoated reverse side (FBB GC2)

CKB™

Fully coated multilayer kraft back board (CUK)

Performa Lumi™

Folding boxboard (FBB) fully coated CTMP board with light pigment coated reverse side (FBB GC1)

The materials for all these packages are produced on the new state-of-the art BM6 line at Oulu, Finland
Performa Nova™ and Performa Lumi™ are both produced with FiberLight Tec™

We create value beyond products

StoraEnso

R&D centres

- Wood fiber expertise
- Pioneering development
- Product testing

Packaging design

- Premium packaging for diverse needs
- End-to-end solutions from design to logistics
- Sustainability, regulatory, and market expertise

Beyond Board Services

- Expertise in fiber-based packaging and sustainability
- Personalised, cost-effective support
- Data-driven services with advanced tools

Technical customer service

- Expertise for running board materials on converting and printing lines
- Production optimisation
- Board grade selection
